CONTENT

There's always lots to do at the construction site. Builder Hannes measures the timber, builds a wall and does the painting. Luckily, help is on the way! The large flaps inspire children to get involved and are super easy to grab and move, allowing children 18 months and over to help out at the construction site. The flaps are made from a particularly tear-resistant material, guaranteeing extended playing fun while also supporting motor skill development and spatial orientation.

THE ILLUSTRATOR

Sabine Kraushaar was born in 1972. Since the first time she held a pencil, she has loved to draw. She studied at the Art Academy in Maastricht / Netherlands and has illustrated many children's books and games.
